

SEARCH JOURNALS

Click here to search journals

This short guide will show you how to search journals in the 'Full Text Finder':

- How to find journals that focus on a particular discipline.
- How to find a specific journal article quickly

If you need any further help with this, get in touch with the library staff at 01 2771605 / 01 2771512

SEARCH JOURNALS

You can find collections of journals that focus on a particular discipline under **'Browse By Discipline'**

For Example: **'Social Work'**

If you wish to limit your results to **Peer Reviewed Journals** only, select that option in the Limits field

Aggression in fragile X syndrome

JIDR Journal of Intellectual Disability Research
Published on behalf of menap and in association with IASSID

Journal of Intellectual Disability Research doi: 10.1111/jir.12238

VOLUME 60 PART 2 pp 113-125 FEBRUARY 2016

Aggression in fragile X syndrome

A. C. Wheeler, M. Raspa, E. Bishop & D. B. Bailey Jr.
RTI International, Research Triangle Park, NC, USA

Abstract
Background Individuals with fragile X syndrome (FXS), especially men, have long been described as presenting with significant behavioural challenges. Despite this known aspect of the phenotype, there has been little research exploring the prevalence, frequency, nature or consequences of aggressive behaviour in FXS.
Methods This study used survey methodology to gather caregiver reports on the types, frequency and severity of aggressive behaviour in 774 individuals with FXS.
Results Based on caregiver report, nearly all (>90%) male and female individuals were reported to have engaged in some aggression over the previous...

Conclusions Aggressive behaviours are a significant concern for a subsample of both male and female individuals with FXS. Given that sensory concerns were predictive of both the frequency and the severity of aggression suggests these behaviours may be a reactive means of escaping uncomfortable situations.

Keywords aggression, fragile X syndrome

Introduction
The phenotype of fragile X syndrome (FXS) has long been characterised in part by behaviours such as aggression, self-injurious behaviour, hyperactivity,
